

ZAK WHATMOUGH

07498 491321 · z.whatmough@hotmail.co.uk · [LinkedIn](#) · zwhatmough.github.io

Economics graduate who turns messy, real world data into clear commercial answers. I'm comfortable across the analyst toolkit, from SQL and Power BI to Python and financial modelling, and I like taking an open problem from raw data through to a finished result someone can act on. Backed by a buy-side equity research internship and a public portfolio of finished projects.

EDUCATION

Manchester Metropolitan University, BSc (Hons) Economics Sep 2023 – May 2026

- Strongest results: Econometrics (96%) and Computational Economics (86%)
- Active in the A14 Investment Society and the Economics Society, attending speaker events and workshops on financial markets and applied economics

Rochdale Sixth Form, A-Levels: Economics (B), Business Studies (B), History (C) 2021 – 2023

EXPERIENCE

Equity Research Intern, Kennox Asset Management, Edinburgh Jun 2026

- Built a DCF valuation for a global equity position using the firm's Sustainable Earnings framework, working through earnings sustainability, quality criteria and intrinsic value
- Pitched the analysis and a buy/hold recommendation to the investment team and co-founder

Investment Insight Day, Hamilton Financial Services, Edinburgh Jun 2026

- Reviewed portfolio performance with the Investment Director and prepared due diligence questions on strategy, attribution and risk-adjusted returns ahead of two live fund pitches, one from a manager running over £400m

Customer Assistant, Market Street, Morrisons Aug 2025 – Present

- Forecast daily demand across two fresh food categories and kept legal compliance books scoring 90% or above in internal audits

Pizza Chef and Acting Shift Lead, Fireaway, Rochdale 2022 – 2024

- Led a team of five to seven across three shifts a week, handling 150+ transactions and up to £3k of revenue a night with full cash reconciliation and stock control

SELECTED PROJECTS (full detail at zwhatmough.github.io)

Morrisons Market Street, strategy and operations review. A 19-slide, client-standard review of Morrisons' counter closures and reopening, built from first-hand experience and 104 tiered public sources, with competitor pricing benchmarking and four recommendations.

E-Commerce Commercial Intelligence. Cleaned and modelled 1M+ real UK transactions in SQL (star schema, CTEs, window functions) and built a four-page Power BI dashboard with around 15 DAX measures and RFM segmentation.

AI Investment Memo Assistant. A Python pipeline that turns an annual report into a cited investment memo where every claim traces back to the source, scoring 90% fact recall against a 50-item test set, with a live web demo.

Integrated 3-statement models: Tesco and Diageo. Full DCF and trading comps valuations built from the filings (around 933 live formulas each), with Python scripts validating every historical input.

Morrisons LBO, CD&R take-private (2021). A formula-driven model of the £9.9bn deal: sources and uses, a four-tranche debt schedule with cash sweep, a returns bridge and sensitivity tables.

Also: five buy-side-style investment memos and an easyJet FY2025 audit risk review.

SKILLS, CERTIFICATIONS AND INTERESTS

Data and analytics: SQL, Python, Power BI, DAX, Power Query, Excel (advanced), R, Stata, data cleaning, dimensional modelling (star schema), dashboard design, OLS regression

Financial modelling: DCF, LBO, integrated 3-statement models, trading comps, sensitivity and scenario analysis, returns analysis (IRR, MOIC)

Finance and valuation: company valuation, investment research, financial statement analysis, WACC and CAPM, IFRS 15 and IFRS 16

Tools and platforms: Bloomberg Terminal, PowerPoint, Git and GitHub

Certifications: Bloomberg Market Concepts (BMC); Bright Network IEUK, Finance and Consulting

Languages and interests: French (conversational); chess, philosophy, financial markets, personal investing, football and golf
